Hunters Turn Guns on Each Other at Fulton.

### SURGEONS PICK OUT THE SHOT.

Twelve of the Leaden Pellets Imbedded Themselves in Myers' Face and Arms, and Three in Rhoades' Legs-Neither Dangerously Hurt.

Canal Fulton, Aug. 8.—Champ Myers and Carl Rhoades, both aged about 20 years, went hunting, west of town, this morning. They returned at noon. Drs. Irvin and Dissinger picked twelve shot out of Myers's face and arms, and three out of Rhoades's legs.

"Myers shot at me to scare me," said Rhoades, "and I turned around and shot at him to scare him. Neither of us meant each other any harm, and we thought we were far enough away not to hurt each other. It was all in fun."

The surgeons say that neither of the boys is badly hurt.

### CRAWFORD SENTENCED.

### Two Hundred Dollars and Thirty Days in Workhouse.

Canton, Aug. 8.—William J. Crawford was arraigned before Mayor Robertson Friday morning on the charge of petit larceny. He pleaded guilty and was fined \$200 and costs and sentenced to thirty days in the workhouse. Crawford was arrested on suspicion of knowing something

about the death of Vincent Hill, found dead in a room at the Barnett house, about ten days ago. After the police investigation had cleared up the mystery of Hill's death Crawford confessed that he had visited the room with several other bell boys and that he had removed \$25 from the dead man's trousers.

Jack Carlton was arrested by detectives at the Elks' carnival grounds Thursday evening on the charge of stealing a gold watch from Miss Youngman, of Navarre. Carlton was taken into custody shortly after the theft at the German village. The watch was found lying at his heels where the detectives believed he dropped it. Carlton came from Massillon Thursday and has figured in police circles before. At present he is confined in the city prison. Three other fellows, supposed to be crooks, were run in by the detectives Friday morning. They gave the names of Harry Fleishner, Sam Frantz, and William Stocket.

### MINE INSPECTOR'S REPORT.

### Twenty Million Tons of Coal Mined in Ohio.

Columbus, Aug. 7.—The annual report of the state mine inspector filed by the Hon. E. G. Biddison, with Governor Nash, yesterday, covering the year 1901, shows that the total output of coal in Ohio was 20,321,290 tons. The total iron ore product was 41,32,5 and fire clay 1,3371,8. Coal was mined in 31 counties, iron ore in 40, limestone in 41 and fire clay in 19.

The amount of coal produced by pick mining was 9,831,476 tons; machine mining, 10,489,814; 429 machines were used in 108 mines; 33,505 persons were engaged in the coal industry, of whom 24,901 were miners and 8,604 day hands; 1,679 operated machines and 9,078 followed machines. The amount of powder used was 249, 861 kegs. The number of mines in the state was 1,006, of which 947 were in operation. Eighty-eight new mines were opened, 59 were suspended and 58 abandoned; 1,668 inspections were made and 187 scales tested. The average number of days worked was 178,106; number of casualties, 514; fatal accidents, 72; serious accidents, 276; minor accidents, 166; tons per

life lost, 282,240. The gain in tons of coal produced was 894,641. Athens county made the greatest gain, followed closely by Jefferson. The counties producing the most coal are these: Athens, 3,-066,535; Perry, 2,563,051; Hocking, 2,348,869; Jackson, 2,141,466, and Guernsey, 2,094,887.

Louisville, O., July 25, 1898. Mr. Slusser-I wish to thank you for recommending your Headache Tablets for Nervous Headache. Have used many other Headache Remedies but did not get the relief I get from using yours. They also do not leave any bad effects after using. MRS. LOUIS BAŬGHMAN.

THE METZGER ROAD LAW. VINO

Prosecutor's Opinion of Effect NIIU of Judge's Decision.

Canton, Aug. 7.—The decision of Judge Ambler, holding the "Metzger Road Law" to be in contravention to the state constitution probably means a return to the district road supervisor plan and the supplanting of the township roadmasters by district road supervisors in Stark and Columbiana counties. Such is the opinion of Prosecuting Attorney Robert H. Day, who will render a written opinion to the auditor on the subject next Mon-

day. To a Repository reporter Prosecutor Day said: "While the decision of Judge Ambler in so far as the perpetual injunction is concerned, applies to Jackson township alone, the township trustees of other townships had best not contract any further indebtedness under the statute. That has been my advice to trustees who have consulted me. If they do continue the roadmaster plan in their respective townships until enjoined it may possibly make them personally liable by reason of the decision finding the law unconstitutional."

"Was the district supervisor law not repealed in the enactment of the Metzger law?"

"No. I do not think so. The act was simply supplemental to the general law and applied only to Stark | the King appeared were a signal for and Columbiana counties. In my plaudits from the populace that opinion the trustees are simply thrown back to the old supervisor law which applies to all counties excepting those for which special laws were enacted. The supervisors who were elected in the spring of 1901 will hold over until the next spring election as they were elected until their successors are duly elected and qualified." "How about the tax levy?"

"Under the old act a part of the road tax could be worked out," replied the prosecutor. "Under the Metzger act the township trustees tor's office and the levy divided be- programme. netx tax collection. Of course it is preceded by the boys' choir, singing for Europe, where, in France, he will tax levy to comply with the old law boys, "Vivat Rex Edvardus," but the looking to a determination of the abil which should be done. Whatever indebtedness has already been contracted under the roadmaster act is not then the King entered and walked to the United States will be conducted affected by the decision."

M. R. Bennett, of Navarre, has been re-elected a trustee of the Fairmount Children's home by the county commissioners for a term of five years commencing May 1, 1902. The commissioners were in Washington township Wednesday where they examined a bridge that is badly in need of re-

With over one hundred babies on their hands and the rain pouring down in torrents the Elks' carnival committee in charge of the baby show had an exciting time Wednesday afternoon. Proud mothers were not to be bluffed by the elements and although the attendance at the carnival was small the entries in the baby show, the feature of the day, were in excess of expectations. All carnival patrons were provided with ballots. The babies were all properly entered and tagged and the voting was done in regulation style. The child of Mrs. Ball, No. 235 North Walnut street, received first prize; that of Mrs. Hudson, No. 1208 South McKinley avenue, second, and that of Mrs. Faber, No. 1016 West Fourth street, third. In the colored show the first prize went to took communion at the altar, the ands, Guam, Luzon and points on the the young son of Mrs. M. B. ### KING BEARS THE ORDEAL WELL.

Archbishop of Canterbury Almost Collapses Before the Ceremony is Concluded—Return to the Palace Delayed by a Heavy Rain Storm.

London, Aug. 9.--King Edward was crowned at 12:39, and Queen Alexandra at 12:55. The recognition in the Abbey was closed at 12:15. The three processions moved as arranged, provoking most unparalleled enthusiasm. At one time the crowd broke through the cordon of troops, and threatened a blockade of the carriages, but order was finally restored. On the roof of the palace were perched the ladies of the household. Their cheers when crowded all available space. The King looked pale, and bowed gravely from side to side. The Queen, beside him, was radiant. She never looked better. Dignitaries in other carriages received but little attention from the crowd. Even Lord Kitchener, in full dress uniform, was not generally recognized. The decorations in the abwas one of picturesque grandeur, cleared away the mass of official cor-

MONDAY, AUGUST 11, 1902

The biblical quotation referring to the blessed estate of peacemakers is often used by Colonel Bryan in his attacks on the administration in coanection with the latter's Philippine policy. Coming from a man who devotes most of his time to stirring up dissension, the passage could be more appropriately used in sarcastic reference to the colonel himself.

It is just as well that the Republi can campaign this fall is to be a stort one. People generally are too busy to do much political work. Dun's weekly review says that prospects for a heavy fall trade are everywhere manifest. Reasons why the Republican tion of the laws. policy should be endorsed by voice s cally demonstrated on every hand. There never was a time when the country had greater reason to approve the Republican party than at present.

the light of seeking again to lead the Democratic party, the New York Sun believes that should the party decide that the colonel is the proper man to head the ticket, he could not honorably say "No." "Of course he couldn't," says the Sun. "If the Democracy insists upon taking him by right of eminent domain, how can be li omeat of the United States the help himself? ### DON'T MISS IT.

Massillon Carnival Sept. 8, 9 10, 11, 12 and 13.

The queerest people on earth are the

Cingalese in the great Bostock-Ferari Mighty Midway Carnival aggregation which will be at the Massillon carnival, week of September 8th, as the amusement feature of the coming carnival. They are natives of the East India island of Ceylon and are fanatics in their religion, believing that if they should chance to die in a foreign land their souls are doomed to eternal punishment. For this reason all previous efforts to induce them to leave their native land have failed and it was not until Director Bostock sent a special ambassador among them that this colony consented to cross the At- | them is a high fence, shutting out all lantic. They have dark skins but the sight of the raw brown gashes and the fine features of the white person and drear, gloomy hills of slate colored ful, religious people, praying night and morning as the sun rises and sinks to rest and nothing can deter ed and outlandish trees, poplars them from their religious devotions. They will not eat food prepared by christian hands nor will they allow a christian to be present at their religious service. They are the sweetest singers in the world and their water dance, stick dance and silver dances are the very acme of the poetry of motion and the most wonderful exhibition of its kind ever seen. As an educational feature this attraction cannot be excelled by anything in America and the enormous outlay of money necessary to get them here has from this fact alone been well spent. You must see them when they come here at the carnival.

### BOSELY WINS.

### Wire First.

The race between the pacing horses of John Bosely, of Canal Felton, and are a delight. They are the last word er men in shirt sleeves sit on their Constable Sibila, of West Brookfield, in stallmaking. Through a screen door, at the fair grounds track, Wednesday, was won by Bosely's horse, which took three successive heats. The time was announced as 3:10, 2:52 and 2:16 Money was offered that the Bosely horse could make a mile in 1867 and 1898, which relieved many 2:35, with pleuty of takers, but rain perity, they are making a lot of need-thousands of unfortunate men from came up and this event could not oc will later.

COAL STRIKE SCENES

Aspects and Contrasts In the Anthracite Fields.

FINE VILLAS OF THE OPERATORS

How the Rich and the Poor Live Happy Holidays For the Mine Mules-Running Mines and Managing Miners-An Irish Groom's Devotion to His Employer-Bad Temper of Reckless Strikers.

Movement is halted; there is a sense as of something tremendous always impending, writes the New York Evenmiles of empty coal cars on the sidcold and idle locomotives, close packed, not a man near them. In the valleys the grimy, black breakers, angular, lopsided structures, high and huge, having indeed a look of inanimate malignancy, squat in exasperating patience on great dismal hills of their own dust and waste. They desolate the landscape; nothing grows upon them, and around them everything is wild. Excepting these culm piles and the tall, stark breakers there is no sign of the method by which the people in the tawdry villages gain a livelihood. The rest is underground.

Many railroads cut along the hillsides and send switches down to the mouths of the pits which the breakers cover. The other morning, from the car window, three different roads (built in days of competition), with their spurs, were visible from the car windows as we ran along a mountain slope, and not a car moving on any of them. In huckleberry pastures you saw blue forms, muscular men in unsoiled jeans stooping over the small bushes with pails and baskets; at stations there were numbers of them, silent, but not stolid, and you could see they were not, even after three months. used to loafing. A few had changed their "shift" or working clothes for muiti, and with odd black trunks bearing Hungarian or Italian railway labels were going to other fields or home to the old countries.

Twice outside Scranton and Mahanoy City strikers were seen on the hage culm piles trying to pick good coal out of the refuse to carry bome to sell. Nearly all companies have forbidden this, and those special guards for mining regions, the coal and iron police, recruited largely in the tough places of cities, patrol the properties

and camp within the stockades. In the midst of these torn valleys somewhere there is often a villa, where the superintendent of the mines or the operator or the owner dwells. When gate, you are in grounds like those over by Wheatley hills, and around dross and leaving only a view of the tops of the green mountains and the sky. The fence itself is hidden by trimmed hedges; the lawns are smooth shaven, with numerous sorts of stuntbrought by the owner as souvenirs of a tour through Lombardy, pines from Fontainebleau, and a formal garden suggested by one in England where he was entertained. The edges of the walks are as precisely straight as the edges of a T square; the walks are from the mountains.

The house is covered to the eaves with ivy and honeysuckle and morning glory, and Dutch pipes spread their wide leaves over the veranda trellis with the regularity of shingles. There is a small pine grove carpeted with brown needles, rustic seats and places for hammocks. The stable is, though small, as beautiful within as George Gould's, at Lakewood-bit steels shining in glass wall cases, silver mounted harnesses gleaming in others and half a dozen Brewster carriages and carts and runabouts and omnibuses keeping fresh and glossy under white sheets. There are only four horses-the operator is an automobilist-but their stalls which lets in pure air while keeping out flies, there is the cow stable, immaculate, its straw sweeter than hotel beds in many of the Caribbees.

And outside are the cows. Jerseys, pure in breed, wholesome to look at, pretty as those painted by Van Marcke, grazing on a velvet lawn. A gate opens into the golf course, smoothly rolled, closely cropped, with tees for wet weather and other tees for dry. Oaks one artificial bunker, which has not been permitted to put any difficulty in the way of the links being a picture. They are pretty stiff hazards. The name of the links is Guess Where. Out of it you open a gate in the hedge to the mule yard.

It is cut up as though with the frolics of a thousand hoofs. You are surprised to learn that it was really cut up by 3,000, and the mules are in three or four long, temporary structures put up hurriedly last May when the strike was declared, to be torn down when the strike is ended. The mules are eating by putting in a bathroom which will their supper. Each day they eat a quart of corn and a quart of oats and seven pounds of hay per head, and are | laid with mirrors of the finest plate sleek and fat. Some of them had not Class. been up out of the underground tunnels where they work for twelve years. None had been up for five or six unless

ir and looked off great distances and Aut their noses to the field, and then, after awhile, they laid themselves down and in sudden access of joy rolled and kicked and nipped one another on the neck. It must have been lovely.

Outside all this, beyond the palings and the hedgerows; are the culm piles, higher than the St. Paul building (New York), some of them like volcanoes in form and not unlike Pelee in utter bareness, and near them, perhaps on a green slope, are the mining settlements.

We light the automobile and start, Opportunity for contrasts, you thinkthe operator's villa and the miner's cabin; a hothouse of perfect flowers here and a bunch of paper roses on the mantel there; everything comfortable to one's desire within and the harshness of the lot of the common worker without. But the contrast strikes you ing Post's special correspondent at only as the contrast of life everywhere. Shenandoah, Pa. You pass miles and There are those above us and below us in fortune in whatever sphere we ings; freight yards are choked with dwell, and the test-isn't it?-is whether we treat them as we ought, decent respect without obsequiousness for those above, nothing but kind generosity for those below. I know operators and owners in these valleys-unfortunately I am withheld from being specific-who have all their lives accepted "the tax of befriending poverty and weakness" and have been helpful and considerate with their dependents. Their wives have sewed strong garments and built hospitals and mechanics' institutes for them, and when there was a deficiency in the township school fund, as there is usually each year, the husbands have paid it up. Many of the families which own the mines now lease them to railroads, but they retain a little concern and interest, not perhaps as much as before, in the workers. Some of the original owners were themselves miners or plain farmers and by industry, thrift and special cleverness were enabled to buy land at \$10 an acre, underneath which, later, coal was found, and their descendants thus came by their present ability to live in villas merely by taking royalty on each ton their property yields to the

There is a band of strikers on the bridge as we cross in the automobile. The operator greets them; all of them answer but one. "That dark young fellow who would not speak to me," the operator says, "is one of those who started the difficulty here. Strikes come in cycles, big ones about once in ten years. When we've adjusted things with one set of workers, the mule boys and the breaker boys grow up, and then they get to discussing themselves, and the older ones are influenced, as one is always, by his environment and companions. Did you ever notice that strike leaders are always young men?"

The miners' houses were roomy and neat and above the average and better than many thousands of workmen in New York city have to live in even after the Tenement House association has prosecuted the landlords. But in other places at Hickory Ridge, outside Shamokin, and at a place between Shenandoah and Girardville, and at Ashley, south of Wilkesbarre, there are, indeed, some pitiably inadequate babitations, in what city people would call the slum quarters. But I am speaking of scarcely a dozen buildings altogether of this bad sort in the ei hteen mining villages I have seen. One of the unhappy phases of this starke is that the very persons whom superintendents, owners and operators helped the most are now the most rabid and inciting and most eager to do them injury. There may have been something wrong with the method of caring for them. Frequently we make our relief to the poor either so painpebbled with small white conglomerate | ful or so ungracious that they rather die than take it. But I have heard of a pleasant appreciation, too, how in the Schuylkill region on the night of the Shenandoah riot an Irish groom paced all night long, up and down on guard, before the gate of the house of his employer (a mine operator) with a revolver in his hand and never let him know about it. A rich man who has the sort of character to enhst secret devotion like that cannot be altogether a hard master.

In the anthracite cities there is almost the Sunday appearance that there is in the valleys. Hotels are empty, callboys and waiters lag about, and the halls have echoes; street corners are full of men saying little; othporches reading newspapers and smoking with an air of feeling themselves out of their element with nothing to do. When you enter a store, you find yourself the only one there. Street cars run only at long intervals, and conductors and motormen are on half time. Practically no business is being done. Many saloons have had to quit. Liere in Shenandoah state soldiers in knaki, galloping orderlies and cavalrymen and a provost guard holding up and elms are the hazards, except for every one at the lines at night who has no passport make the city seem like invaded territory. On account of restraint forcefully imposed there are sallenness and desperate thoughts and even desperate action among the reckless element, as when in the dark the ether morning they shot at and stoned the camping soldiers from behind laurei bushes.

### IMMUNE COTTONSEED.

Experiments by the Department of Agriculture to Prevent "Wili." A special to the Boston Transcript from Valdosta, Ga., where the United States department of agriculture has been making experiments to see if "wilt" or "black heart" could not be prevented in cotton, says that the result is that seed have been obtained that are totally immune to this dis-

The process has been on the line of "breeding," the seed being carried up to the highest quality of healthfulness by careful cultivation. Professor Orton says that the experiments show that the only hope of the farmers in getting rid of the disease where it has once got a foothold is by the use of immune seed. The disease is said to be of fungus origin and remains in the soil to make its appearance after seven years, the land having been planted with other crops in the meantime. Professor Orton regards "black

heart" as the deadliest enemy of cotton and one with which farmers cannot afford to trifle. If allowed to go unchecked, he thinks it will in a few years ravish the sea island cotton fields as it has the upland fields in some sections of Alabama and other cotton growing states. Professor Orton also had an experi-

ment in planting Egyptian cotton, which was tried in this section this year, but the result leads to the conclusion that the Egyptian staple is not adapted to the soil and climate of this section. There appears to be too much moisture, producing a large, woody plant with little fruit upon it. The tests that have been made in Texas and along the Mexican border are said to have been much more satisfactory.

### RAILWAY AMBULANCE CARS.

Seventy-seven Stations In Germany to Be Equipped With Them.

To insure immediate aid to persons injured in train wrecks the state railway administration in Germany has decided to maintain ambulance cars at seventy-seven of the principal stations throughout the country, says a Berlin dispatch to the New York Times. The cars will contain a full hospital equipment, including operating tables and beds, calculated particularly to render everything necessary in the direction of first relief.

Each car is to be in charge of a medical officer, while all railway employees will be required to be trained in the performance of first aid duties. The cars will be so located that none will be more than an hour and a half away from a hospital, thus rendering quick transportation for victims who require serious attention.

Within the past year there have been an unusual number of railway fatalities in Germany due to the inaccessibility of medical facilities.

### NEW LIFE PRESERVER.

Food, a Lamp, a Trumpet and Weapons (an Be Carried In It. A new life preserver has recently been

tested on Lake Geneva, writes the Paris correspondent of the New York World. It is composed of a costume of india rubber, opened at the waist, which can be very rapidly donned. It is waterproof, with several airtight compartments. These can be used as pockets for a lamp, provisions, a trumpet to call for aid and even a weapon for repulsing the attack of dangerous

Half of the body remains at the surface of the water. The inventor in his life preserver has remained in the water five hours. But that is a mere bagatelle. He intends to pass fifteen

days in the sea at Havre. The Next Great Alpine Tunnel. Continental tourists will be interest

ed in a project now believed to be very near realization for the construction of a tunnel through the Jura near the Col de la Faucille, says the Westminster Gazette. The practical result of the execution of the plan will be that the route from Paris to Geneva will be direct instead of roundabout and that Geneva, instead of Lausanne, will be the natural point at which to enter Switzerland for the Rhone valley resorts and proceed by the Simplon to Milan. The actual distance from Paris to Milan will, indeed, only be one kilometer less by the new route than by the old, but time will none the less be saved. Owing to the steep gradients trains can only creep from Pontarlier to Lausanne. By the new route they will be able to run at express speed all the way from Dijon to Geneva.

Monument to British at Delhi. The secretary for India has commissioned a London firm to execute a granite monument to be crected at Raipur cemetery, Delhi, says the London Standard. Portraits of the king and queen and of the late Queen Victoria will be carved on the sides of the monument, together with the following inscription: "Sacred to the memory of the officers and men of the British army buried here who fell before Delhi from June to September, 1857, gallantly upholding their country's cause "

Pills For Mosquitoes.

Quinine having proved inadequate to forestall malaria carried by mosquitoes, Professor Grassi of Rome is experimenting with a pill that, besides quinine, contains iron, citron, arsenic and "bitter extract," says the New York Journal. Grown persons take six, children half as many, pills, and no mosquito goes near them.

Farming by Electricity. A professor in Finland is trying a method of using electricity in agriculture. A seedfield is covered by a network of wire, and a strong current is turned on nights and chilly days.

### MAN MUST STAY IN THE MINE.

Lithunians Held Responsible For Beddal's Death Placed In Jail-Guarded by Soldiers to Prevent Friends From Releasing Them.

Shenar doah, Pa., Aug. 9.-A platoon cf the Governor's troop of cavalry went to Turney Run Hill yesterday on an errand of mercy and rescued a small family from violence of the acts of violence reported from that territory nearly every day for a week. Yesterday Brigadier General Gobin received a pathetic letter from the wife of a non-union workman, who is employed in the Gilberton colliery of the Philadelphia and Reading Coal and Iron company, in which she tells of the treatment accorded her by the strikers in that vicinity. Among other things she said rocks had been thrown through the windows at night, one of them nearly striking her sleeping child; the house damaged, and while she was out doors one night a I ullet was fired at her. She also said that crowds gathered around the house, hooted and jeered at her and the child, and hung crape on the door. Her husband, she concluded, was comnelled to stay in the mines in order to make money to keep them from starving, and as he could not leave his work she asked the commanding officer of the troops here to protect her. Turkey Run Hill has no police protection and General Gobin decided to help the woman. He learned that the was not in the best of health, and it was decided that she had better be taken from the place to the Pottsville hospital. To carry this out the general ordered a platoon of cavalry to make a demonstration in that section and while there to escort the woman and child to the railroad station. This was done.

Soldiers Hooted and Jeered.

The troops rode all over the territery and found that the population, which is made up of many foreigners, was not in the best frame of mind. The soldiers were hooted and jeered and called uncomplimentary names. Only one stone was thrown at the horsemen, and this was done ty some one in a crowd on a high The cavalrymen stopped their horses ast year, and 21.8 per cent over 1900. erd the crowd scattered instantly.

The two Lithunians who were more charges of murder will be brought. The police officials are hav ing much difficulty in ferreting out the participants in the riots. The foreigners are standing together and arc | May 1. not volunteering any information. It was feared that an attempt would be made to rescue the two Lithunians sections of the country, especially held for murder and the other charged where the larger and more importanwith rioting from the little lockup crops are raised. It is now about early yesterday morning. In consequence a company of soldiers on will be far above the average as t guard duty close at hand was kept in quantity, while the low stocks at the readiness to march. Extra guards opening of the reason are calculate were on duty at the borough building to sustain prices, and there is it i in which the men are confined.

### INTIMATED IN STATEMENT MAGE

Said Trust Question Didn't Figure. His Private Secretary Said Mrs. Knox and Daughter Were Two of the Party-Young Struck One Man.

Oyster Bay, N. Y., Aug. 9.-To a representative of the Associated Press Actorney General Knox confirmed the Diphtheria has broken out in the report that he had had a represent difficelty with a party of men in Atlantic

incidents," said he, "that sometimes George Creat, of Rushsylvania, near occur ... a restaurant or other public Bellefontaine, O., while hunting was liate. Accompanied by Mrs. Knox, accidentally shot, the bullet ensering my daughter and two or three friends, including District Attorney Young, of Pittsburg. I was dining in the restauley, of Youngstown, O., was decapi- rant of the Garden hotel. A party of tated by a trolley car on the Mahon- men, none of whom I knew, seated themselves at an adjoining table. Their conduct was unseemly and party and upon me were insulting, to put it very mildly.

"In the circumstance, accompanied as I was by the ladies, I could not At Springfield, O., Jacob E. Shirey, resent their actions or their words at that time. They evidently were t got my party out of the restaurant. Probably Assailant Don't Feel Weil.

"Then I returned," continued Mr. Knox, with a smile, "to see if the men really were looking for me. I think they were, for scarcely had I approached them when they sprang up. One of them aimed a blow at my stomach, but it failed to reach me. I have no idea who he was. What happened to him I am not prepared to say. Those things occur very quickly. I am quite satisfied, however, that he does not feel as well today as I do. You will note that I am

"You do not know who were in the party of your assailants?" the attorney general was asked.

"Not positively. I understand that Charles T. Schoen, of Philadelphia, and one of the Cramps, also of Philaaelphia, were in the party, but even of that I am not at all positive.

"What actuated them I do not know. A newspaper of today said it had semething to do with my attitude on the trust question, but that seems to he entirely unlikely. As they sat at the table in the restaurant they made no reference to the action which, as attorney general, I have taken against certain so-called trusts. Their remarks were personal to me and to my family, and were of such a nature that I could do nothing but resent them.

"I understand that after I left the isstaurant at the conclusion of the difficulty the waiters suppressed the crowd with some energy."

The attorney general evidently was not in the least injured by his assailents, and as he chatted about the trouble did not seem to regard it very ecriously.

Washington, Aug. 9.—Charles C. Long, private secretary to Attorney Ceneral Knox, last night, ia talking of the affair in Atlantic City, in part. cald Mrs. Knox and daughter were two of the ladies in the attorney gencral's party. After the ladies were escorted to the door, Knox walked back and said to the party: "You ere a set of blackguards." Mr. Long also cald in part:

Young and Opponent Fell to Floor. "At that Steve son sprang to his feet and selzed Mr. Knox by his coat, tearing off the buttons. Mr. Young had followed the attorney general back to the table and at this onslaught he launched a blow in the direction of Stevenson. It was a stiff, short arm one that struck Stevenson en the head, but did no special damage. Noting this, the district attorncy closed in, clinched his opponent and both fell to the floor. I cannot say what the other two men did or did not do, for in a twinkling the waiters were on the scene and separated the combatants. The attorney general's party left the hotel, and that ended the matter.

"The attorney general was desirous that the affair should not get into reint, although it was one of the incidents that might crop out in any public place and happen to any one."

Mr. Long was asked whether the trust question had anything to do with bringing on the collision.

"No. I do not think so," he re-Ilied. "The trusts were not spoken of during the discussion, and I think it is quite foolish to attribute the encounter to such a source."

A great deal of feeling was evidenced here against the assailants of the attorney general. It is fortunate for the offenders that the anti-au. archy bill, which imposes a severe penalty for an assault upon a government official liable to succeed to the presidency, did not become a law, although regret that it failed of passage was general.

MRS. ELIZABETH B. WILSON. Mrs. Elizabeth B. Wilson, widow of the late Aaron Wilson, died at 1:30 Saturday afternoon. The deceased was 82 years of age, was born if the wearer is a staff officer, but does in Paris, France, and had lived in Massillon thirty years. Five children, four daughters and one son, survive. The funeral services will be conducted from the residence at the corner of East and Cherry streets,

MRS, SARAH PHILLPOT. The body of Mrs Sarah Philipot was received over the Pennsylvania railroad lines Friday night from Imperial, Pa., Frank E. Forest brought a stalk of where she died August 6, of hemorrhage

MARY E. MAXHEIMER. Mary Elizabeth Maxheimer was with wonderful patience never utterwas called to pass through. The gen-The Merchants' Street Fair and the spirit that brought so much sunment of clay to be with Him who said 'Let the little ones come unto Me." Oh! It seems So dark and lonely now, for

us to see the way, Since death hastorn the many chords that bound us, And now we will walk alone from day to

day, With "Our Mary's" angel spirit hovering round us

Ere those busy, tircless, little feet had over learned to stray Death has come and cut the many chords that bound us,

Now as we sit in silence, alone, from day to "Our Mary's" angel'spirit hovers round us And when our meals are taken, in silence

strong and deep. How many are the memories that sur round us. But while we sit and ponder, those memo-

ries seem sweet, For "Our Mary's" angel spirit hovers round us

When our dally cares are ended and we seek our couch to sleep, Oh! how strongly then we feel the ties that bound us. But when we lie in sorrow and very often

"Our Mary's" angel spirit hovers round us How our hearts are fraught with sorrow on awakening from sleep, For absent are the fondling arms that

bound us; They lie buried in the churchyard, while we are left to weep,
But "Our Mary's" angel spirit hovers round us.

The light and life of our home is gone, we miss her everywhere, Where'er we look, sad memories surround

Her absence meets at every turn, and stops at Grandpa's chair, But we know, her angel spirit hovers round us.

Whate'er has been her mission in this world it's been fulfilled, And severed are the many ties that bound

But amid life's cares and sorrows, may our aching hearts be stilled
By "Our Mary's" angel spirit hovering round us.

When our earthly cares are ended, we'll be summoned one and all, To reunite the many chords that bound

When our final summons comes, and we heed the Master's call, spirit hover May "Our Angel Mary's" round us.

### BIG COAL STRIKE.

### Segner & Stansbury Company Find Six Foot Vein.

All chevrons are to be sillon coal. The strike was somewhat worn properly hereafter, points upunexpected at that depth, and the ward. drillers were becoming discouraged, when, after going through about ten thorized for officers, practically the feet of hard rock, a layer of slate was same as is worn in the navy, a civilian in North West street, on the vacant struck. This is always an indication dress coat with brass buttons, the tot which stretches from the river to of the presence of coal, and the hole full dress uniform. With this a white Cherry street. A tall fence is to be was immediately cleaned out after the or blue dress waistcoat, with brass butconstructed on all sides, except along slate had been drilled through, and tons, and full dress uniform tronsers

vem of the best coal.

### THE NEW ARMY UNIFORM

Latest Regulations.

For Service Wear the Garb Will Be Olive Drab-Four Kinds of Uniform Now Required - Sabers Take the Place of Swords-Special Full Dress For Officers.

Right on top of an order announcing a change in the bill of dress for the Massachusetts volunteer militia comes the bill of dress making radical changes in the uniform of the United States army, says the Boston Herald. The army order covers all matters relative to the outward appearance of every officer and man in the army.

Four kinds of uniform are now required. These are: Full dress, an iment undress uniform; white uniform, and the service uniform. The new full dress is a frock coat with shoulder knots of the flat Russian pattern, abolishing the present shoulder knots. It adds gold striped trousers or breeches not change the trousers worn by line officers of artillery or eavalry, and gives a new cap. The dress uniform is practically the same as the existing undress or fatigue uniform, consisting of a blouse, cap and trousers. Then come time. the white uniform and finally the new service coat, trousers, cap, all in olive drab color. The service coat is to fit tightly at the waist, so that the saber belt may be worn outside, and to be at least five inches in excess of the chest measurement at the chest.

There are to be outside pockets on this coat, and the description shows that we have copied the uniform of the British India service, which our officers highly recommended after they have dress, white, service and fatigue uniforms. The overcoat to be worn will be a double breasted ulster of olive drab cloth, the front to have buttons by which the corners may be buttoned back out of the way when marching. This is a touch copied from the overcoats of the Russian army.

Details of the uniform: The general decorations for the collars of their own full dress coats. Other general officers will have gold oak leaves around their collars and the officers of lower rank plain gold braid, with the color of the arm or corps below the stripes. The same privileged officers may deother officers must wear cuff ornaments similar to the color decorations.

General officers only wear the chapeau and only when dismounted. All others will wear the cap except when on service. The cap is like an automobile cap, flat, with overhanging top and drooping visor. According as the cap is full dress or merely dress, it will be ornamented with gold leaves or braid or plain. The white cap will be plain. The white helmet is retained, but the service helmet is new. It is to be of cork, covered with olive drab material, with a puggaree. Besides this, the service or campaign hat is part of the uniform.

The shoulder knots will not serve to indicate the different ranks hereafter; they will show merely that their wearer is an officer. His rank will be shown by the sleeve ornaments; as in the French and Japanese armies. Above the cuffs, which are to be ornamented, will be one star, two or more stars, according as the officer is a brigadier general or higher, while rows of braid will indicate the grades below those of gen-

Sabers take the place of swords, and russet leather belts are to be used instead of black ones. Officers of the signal corps will wear shoulder belts in full dress, dress and service uniforms. The facings of the departments and arms of the service are changed to

some extent. Those for general and staff officers will be dark blue; officers of engineers serving with engineer troops will have red facings, piped with white; signal officers, orange, piped with white; ordnance officers, black, piped with scarlet, following the British rule, and medical officers, instead of green, will have maroon facings. Quartermasters' facings will be

Yellow will remain the cavalry color, scarlet that of artillery, and light blue instead of white will be the infantry color. Medical officers will give up the Geneva cross as their device and wear a caduceus. Aids-de-camp will not wear the corps devices of the arms to which they belong, but instead will wear an American shield, surmounted by an eagle. On the blue field of the shield they will display stars, according to the rank of the general on whose staff they are serving.

Chaplains will wear Latin crosses instead of shepherds' crooks. Officers of the letters "U. S." all officers will wear on all uniforms, except the full dress. a special device of the arms of the

A special full dress uniform is au-

### A CONFERENCE HELD.

### Miners and Operators Meet in Massillon.

Robert Legg, of East Greenville, and John Morgan, of North Lawrence, presdent and secretary, respectively, of the district branch of the United Mine Workers, held a conference in this city today, with Manager W. J. Mullins, of the Massillon Coal Mining Company. The miners and operators put different constructions on the clause of the scale which says that "five cents per ton extra shall be paid when night work is necessary." The miners hold it to mean that the five cents must be paid to both the day and night men in mines where a night shift is worked. The operators say it applies only to the night

Mr. Mullins promised to investigate the established precedents, and will return an answer to the union next Sat-

### TWO ITALIANS HURT.

Sides of a Pipe Trench Cave In Today.

Canal Fulton, Aug. 9.-Two Italian laborers whose names cannot be earned were severely injured at this place this morning. The sides of a waterworks pipe line trench, in which they were working, caved in. They were completely buried for a short

#### Thousands Have Kidney Trouble and Don't Know it.

How To Find Out.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or set-

tling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble; too frequent desire to pass it or pain in

the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part and lieutenant general may choose the of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the his sign their own cuff decorations. All derful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and \$1. sizes.

You may have a sample bottle of this wonderful discovery and a book that tells more about it, both sent address Dr. Kilmer & Home of Swamp-Root. Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper.
